PROFESSIONAL PROFILE

Junior web developer with current internship/training experience and previous IT support experience. Builds browser interfaces, REST APIs and database-backed applications using JavaScript/TypeScript, React, Python and Django. Practical exposure to automated testing, Docker and CI/CD. Seeking junior full-stack, backend or software engineering opportunities.

TECHNICAL SKILLS

JavaScript, TypeScript, Python, HTML, CSS, SQL | React, Vite, Next.js | Django REST Framework, Flask, Node.js, Express | PostgreSQL, Firebase, MongoDB | Git, Docker, GitHub Actions, REST, JWT, Jest, Vitest, pytest

TECHNICAL ACHIEVEMENTS

- Implemented a Django REST seat-booking API with role-based permissions, timed holds, row locks and transaction-safe reservation logic. [source]
- Built a responsive React meal planner with Firebase authentication, per-user history, validation and automated tests. [source]
- Developed AlgoScope to animate data structures and algorithm execution in interactive 2D/3D views. [source]
- Created a Next.js/TypeScript programming game with code-driven maze navigation and local progress saving. [source]
