ZAID AKHALWAYA

JUNIOR SOFTWARE DEVELOPER | FULL-STACK WEB DEVELOPMENT

Johannesburg, Gauteng, South Africa | 082 316 6619 | zaidakhalwaya6@gmail.com

GitHub: github.com/theZoid9 | Project Portfolio: Google Drive

PROFESSIONAL PROFILE

Johannesburg-based junior software developer and current web development intern with practical experience building frontend applications, backend REST APIs and database-driven projects. Works with JavaScript, React, Node.js, Python, Django and Flask, backed by previous IT support experience and a Higher Certificate in Systems Engineering. Seeking a junior software development or graduate-equivalent opportunity.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS, SQL

Frontend: React, Vite, React Router, CSS Modules

Backend: Node.js, Express, Django REST Framework, Flask, REST APIs, JWT

Data & tools: PostgreSQL, MongoDB, Git, Docker, Postman, Jest, React Testing Library, pytest

SELECTED TECHNICAL PROJECTS

Event Ticketing & Seat Reservation API | Python, Django REST Framework, PostgreSQL, Docker | View code

- Built an authenticated event booking API with role-based access, timed seat holds, atomic reservations, row locking and API documentation.

React Fitness Tracker | React, Vite, React Router, Jest / React Testing Library | View code

- Developed a routed fitness application with exercise browsing, weekly planning, workout logging and localStorage-backed progress views.

Library Management System | JavaScript ES6, OOP, localStorage, Jest | View code

- Refactored a book-lending application; improved borrowing and return validation, storage recovery, member workflows and automated tests.

EXPERIENCE

Web Development Internship / Training | Current

- Developing practical software engineering skills through web application projects, debugging, testing and API development.
- Working with JavaScript, Python, React, REST APIs, version control and databases in hands-on project work.

Umuzi | Data Engineering Recruit / Web Development Recruit | 2 years

- Completed structured technical learning in data engineering and web development, with programming and problem-solving practice.

Perfect Laser Technologies | IT Support Technician / Service Controller / Administrative Assistant | 1 year

- Supported IT users and handled service-related coordination and administrative tasks.

HSC System | IT Support Technician / Data Capture | 1 year

- Provided IT support and maintained accurate data records.

EDUCATION & CREDENTIALS

Higher Certificate in Systems Engineering — PC Training & Business College

CompTIA A+ coursework — Boston City Campus

Matric (Grade 12) — Chris J Botha
